

## Meeting Agenda

Date: 21-04-2016

Facilitator: Julia

Participants: Kevin,Petros,Long,Eric

1. Objectives (5 min). Resolve any issues preventing the team to continue.

1.how to communicate between server and client?

how to represent queue?

2. Reports (15 min) from previous meeting

Reworked some of the Diagram UML

Ran some dry runs

Hardcoded some classes

3. Discussion items (35 min)

firebase,socket,retrofit to communicate?

queue using id , problem need to sync between all phones. Important that the queue is synced with every client.

Where to host data, maybe better on server than host.

4. Outcomes and assignments (5 min)

Look at JÚNIT

gradle

start on mvc-version of project

5. Wrap up
