

Meeting Agenda

Date: 12-05-2016

Facilitator: Julia

Participants: Kevin, Petros, Eric, Long

1. Objectives (5 min). Resolve any issues preventing the team to continue.

How to connect activities with controller class properly.

Firebase, how should we save the queue? ON firebase or model.

- Short clear description ([http://en.wikipedia.org/wiki/Issue_tracking_system]|use an issue tracking system]).

2. Reports (15 min) from previous meeting

Kevin- chat finished, authenticator finished, homeactivity made

Petros- Worked on the queue

Long- Made cartActivity.

Eric-

- Each groupmember reports outcome of assigned issues, see also 4)

3. Discussion items (35 min)

see 1)

- Discuss issues from 1 and 2, possibly new or more general issues (very short notes and/or keywords)

4. Outcomes and assignments (5 min)

Save the orders that are sent up to firebase in a local queue in host.

Try to have a main activity that all controller class goes through , mainactivity delegastes to other activities.

- Outcomes from 3). I.e. write down what's decided and why it was decided? Sync with other documentation (add terms to wordbook)

- From outcomes, 1), 2) and 3) (re)assign each groupmember issues to solve.

Make queue system work with firebase, continue with gui, continue with the sdd.

5. Wrap up

Is it possible to delege activities through a main activity.

- Write down unresolved issues for next meeting.
- Time and location for next meeting
